

ROLF C. HAGEN (UK) LTD. PRESS RELEASE
26/03/2014

The compact filter that packs a powerful punch!

The new Marina iFilters are a compact yet powerful range of filters designed for use with Marina goldfish aquariums or any other goldfish or tropical tank.

The filters cater for tanks from 25 litres to 160 litres, making them a very adaptable and reliable filter that effectively filters water through 3 stages of filtration, creating a cleaner and healthier aquarium environment.

The filters uniquely designed Power Cartridge (included) enables the water to enter the centre of the cartridge for an effective mechanical, chemical and biological filtration process and exit from the polyester foam layer leaving all trapped debris inside the cartridge, ensuring your aquarium water is crystal clear.

The Marina iFilter range consists of the i25, i110 and i160 and retails from £17.99 - £35.99.

Key Features:

- Enhances aquarium water quality
- Bottom positioned motor for quiet operation
- Waterfall spout for continuous oxygenation
- Effective 3 stage Filtration (mechanical, biological, and chemical)
- Easy replacement of Power Cartridge
- Compact size and energy efficient
- Refill Power Cartridges available (sold separately)
