

# New and Improved Hagen Tropic Mash Hand-Feeding Formula is Best Ever

## Tried-and-True Baby Parrot Food Now Made in Canada

MONTREAL, Canada – April 6, 2012 – Parrot breeders all over the world trust Hagen Tropic Mash Hand-Feeding Formula for providing their precious baby birds with all the essential nutrients necessary for excellent growth and brilliant plumage.

A long-time favourite among aviculturists, the baby food is a result of industry-leading research and development at Hagen Avicultural Research Institute (HARI), the world-renowned avian research arm of Rolf C. Hagen Inc.

a source of 8 essential grains that complement amino acid profiles, all critical to the proper growth and well-being of parrot chicks from hatch through the fledgling age,” said Josee Bermingham A.H.T., HARI facility manager.

Ingredients for the new and improved mash are sourced locally, which means consumers get fresher food faster. In addition, the fact that it’s now made in close geographical proximity to HARI, located in nearby Rigaud, means quicker turnaround times for final HARI quality assurance approvals and enhanced freshness-to-market efficiencies.

As with all HARI-approved bird food, Tropic Mash Hand -Feeding Formula undergoes rigorous 3-stage testing, which is unprecedented among bird food makers. Two onsite tests at Hagen Industries and final batch testing at HARI ensure that consumers get safe, dependable and top quality bird food for their treasured feathered friends.

**“We are very proud of Tropic’s outstanding 25-year tradition of raising thousands of parrots over several generations at HARI. At a time when most bird food companies have shut their research centres, HARI continues its ongoing work on the research and development of advanced bird nutrition. In fact, it’s the longest-standing research facility dedicated to studying the care and breeding of parrots,” said Mark Hagen, M.Ag., Research Director at HARI.**

Today, HARI proudly announced the launch of new and improved Hagen Tropic Mash Hand-Feeding Formula, which is now made in Canada at Hagen Industries in Montreal.

With new and improved Tropic Mash Hand-Feeding Formula, breeders and their baby parrots will enjoy many major benefits.

For starters, it’s so much easier to mix and it quickly blends in seamlessly to create a smooth and consistent clump-free mash. This makes preparation quick and easy, improves feeding, and enhances digestion.

“Tropic’s advanced hand-feeding formula continues to deliver all the nutritional potency that has made it a leading food for baby parrots around the world. It’s an excellent peanut-derived source of fat and protein as well as

**Thumbs Up!!**

“The new and improved formula is very easy to mix with a whisk for small batches and does not clump. There are no small grainy particles and the consistency is very smooth. Hence, it does not clog up the feeding syringes. I’ve been using it for my baby parrots and cockatiels and they’re digesting well and fast, crops empty completely between feedings and growth rates are comparable to results of babies raised using another brand.”
