

**Important - Please read these instructions fully before starting assembly**

If you need help, or have damaged or missing parts, please call **0141 945 2888** and ask for the QC department. However, please note if your product has been subject to obvious carrier damage to the carton during transit to your home, we recommend that you contact your supplier.

### FITTINGS

Please note this fittings pack is used in different products, therefore it may include extra fittings that are not required in this product.

### PREPARATION

PLEASE NOTE THE PACKAGING CONTAINS 2 WOODEN END PROTECTORS. THESE PANELS ARE FOR PACKAGING PURPOSES ONLY AND ARE NOT PART OF THE PRODUCT.

Please visit [uk.hagen.com/vivexotic](http://uk.hagen.com/vivexotic) for more information

We recommend Exo Terra reptile accessories for use with Vivexotic products. Please refer to the 'Exo Terra Essential Care & Equipment Guide' included with this product for further details.

Repti-home vivariums stack perfectly together, and can be lifted off the ground using adjustable silver feet.

A matching Viva cabinet (available soon) can also be purchased to fit directly onto the base of this vivarium.

### PROTECTING YOUR VIVARIUM - SILICON SEALING

Wooden vivariums are not recommended for pets that require tropical environments. It is advised that once built, you seal all joints and exposed fittings with aquarium silicon sealant, and leave overnight to cure. This sealing will prolong the life of your vivarium and proactively safeguard against accidental water spills and pet wastes. If your pet requires misting, it is essential that no excess water is left pooling within the vivarium. If water is allowed to seep into exposed joints, gaps or inadequately sealed edges the wood will swell.

We strongly recommend that the vivarium is sealed fully after construction, particularly where humidity levels are high. We recommend that humidity levels do not exceed 65% in any wooden vivarium and cannot guarantee the longevity of the vivarium in this case. For species requiring high levels of humidity we recommend Exo Terra Glass Terrariums. Please visit [www.exo-terra.com](http://www.exo-terra.com) for more details.
