Introducing Repti-Home from Vivexotic

Make your Reptile feel right at home in his brand new Repti-Home!

The brand new range of vivariums from Vivexotic are now available. The new Repti-Home range is available in 5 different sizes and 3 different colours enabling the user to choose the right one to suit not only yours but your reptile's lifestyle!

As an update of the Repti-Stax range, the new Repti-Home collection of vivariums has added 2 larger sizes to the product offering of the Medium Tall and the large Tall, and all vivarium sizes are available in 3 different colours of beech, oak and walnut.

As a great value living space for your reptile, Repti-Home Vivariums are incredibly versatile, well made and have the added benefit of being able to be stacked together in multiple ways to make the best use of your space.

Full details of the Vivexotic Repti-Home range are below:

The vivarium is without doubt the most important aspect of successful reptile keeping. Many species have different requirements, so a versatile and easily adaptable vivarium is essential.

The Vivexotic Repti-Home vivarium is the ideal reptile housing. The front sliding doors allow easy access for maintenance and feeding. Ventilation slots in the rear panel ensure a steady flow of air throughout each vivarium and all the glass used in Repti-Home vivariums is toughened to BS6206A kite marked standards. This means it has up to 5 times its original strength, and if broken, the glass breaks into small blunt fragments creating a safe environment for you and your reptile.

The environmentally friendly wood material comes from recycled sources or FSC sustainable forests and is not only great insulator for desert dwelling reptiles but it also creates a warm, dry habitat making these vivariums perfect for bearded dragons, corn snakes and leopard geckos.

Benefits of the new range

- New sizes ó introducing Medium Tall and Large Tall ó perfect to add to your vivarium collection and giving your reptile 33% more living space
- New colours ó in addition to beech, the new walnut and oak colours will sit perfectly in any home environment
- Improved fixings ó every Repti-Home vivarium comes complete with OneFix connectors - top quality, plastic connectors that combine the housing and the bolt in one single fitting ó which means fewer fittings, quicker assembly and no corrosion! They will also ensure your reptile will be in safe and secure hands in his new home!
- Flat pack design ó for easy assembly. We estimate that it should take 10-30mins for most people to build a Vivexotic vivarium.
- Outlet points have been formed in the edge of the back panel for cable management. Any size of plug or fitting can easily pass through prior to securing the lid.
- Versatile, affordable and stackable vivariums, perfect for any reptile enthusiast

Repti-Homes are the perfect compact vivariums for all your animal needs, designed to fit any kind of space and environment.
