Introducing Repti-Home Maxi from Vivexotic

Give your reptile MAXimum room!

Repti-Home is evolving in a MAXimum way with the introduction of the new Repti-Home Maxi range.

The brand new range of vivariums replace the current Repti-Home Tall range but with some significant new features and benefits, making it even easier to choose a Repti-Home vivarium to suit not only yours but your reptile's lifestyle!

A significant feature of the Repti-Home Maxi range is its depth. Throughout the range, the depth has increased from the current 37.5cm to 49cm, which gives a 30% increase in floor space for your reptile to relax in.

The new Repti-Home Maxi collection of vivariums are available in Medium, Large and XL sizes and come in a choice of 3 modern colours – beech, oak and walnut (XL only available in beech).

As a great value living space for your reptile, Repti-Home Vivariums are incredibly versatile, well made and have the added benefit of being able to be stacked together in multiple ways to make the best use of your space.

Full details of the Vivexotic Repti-Home range are below:

The vivarium is without doubt the most important aspect of successful reptile keeping. Many species have different requirements, so a versatile and easily adaptable vivarium is essential.

The Vivexotic Repti-Home Maxi vivarium is the ideal reptile housing. The front sliding doors allow easy access for maintenance and feeding. Ventilation slots in the rear panel ensure a steady flow of air

throughout each vivarium and all the glass used in Repti-Home vivariums is toughened to BS6206A kite marked standards. This means it has up to 5 times its original strength, and if broken, the glass breaks into small blunt fragments creating a safe environment for you and your reptile.

The environmentally friendly wood material comes from recycled sources or FSC sustainable forests and is not only great insulator for desert dwelling reptiles but it also creates a warm, dry habitat making these vivariums perfect for bearded dragons, corn snakes and leopard geckos.

Benefits of the new range

- New depth - increased from the current 37.5cm to 49cm. This gives a huge **30% increase** in floor space in every vivarium!
- New size ó introducing the XL Repti-Home Maxi, a massive 1375mm (54ö) wide x 490mm deep ó plenty of room for your reptile to explore!
- Larger rails - allows deeper substrate and less obtrusive lighting installation
- Improved rail construction to ensure the rails are held firmly in place
- FSC certified wood
- Cable access holes for up to 3 cables each side
- Secure toughened glass sliding doors
- No exposed chipboard on vivarium floor - no mites or moisture can penetrate the vivarium
- Vertical woodgrain on side panels ensuring the vivariums sit beautifully on the current Vivexotic Viva range of cabinets
- Non peeling laminate
- Manufactured in the UK - you can be sure of a high quality, neatly constructed vivarium
- Optional, adjustable, silver feet available separately in packs of 2

Repti-Homes are the perfect compact vivariums for all your animal needs, designed to fit any kind of space and environment.
