Exo Terra Pebble Waterfall

Stimulate your Reptile's natural drinking behaviour

Waterfalls and streams are an important feature in every tropical environment and with the new Exo Terra Pebble Waterfall, bringing that little bit of nature into your living room couldn't be simpler.

The cascading water helps to stimulate the natural drinking behaviour of reptiles and amphibians such as chameleons, anoles and water dragons helping prevent dehydration whilst increasing humidity levels in the terrarium.

Cleaning is easy, as the waterfall can be dismantled into several parts and only requires removal of organic waste from the collection tank at regular intervals to keep the water clean. An Exo Terra Repti Flo pump is included to provide water circulation and the sturdy design means it is a very stable accessory that cannot easily be tipped over by larger reptiles.

Available in three sizes:

Small PT2910
Medium PT2912
Large PT2914

RRP from £37.79 - £78.79
