

VIVEXOTIC

Vivariums for pet owners, enthusiasts, breeders and retailers

Features

Forest Stewardship Council

All our timber comes from recycled sources or FSC sustainable forests. The FSC product label allows consumers worldwide to recognise products that support the growth of responsible forest management worldwide. Environmentally appropriate forest management ensures that the harvest of timber and non-timber products maintains the forest's biodiversity, productivity and ecological processes.

Easy Self Assembly

Vivexotic vivariums and cabinets are designed with as few parts as possible for quick and easy assembly.

Toughened Glass

All the glass used in our vivariums is toughened to BS-EN-12150 kite marked standards. This means that it has up to 5 times its original strength and, if broken, the glass breaks into small, blunt fragments. Normal plate glass breaks into long sharp shards when damaged. As the glass is used for the sliding doors it is crucial that only safety glass is used to prevent serious injury. We aim to conform to BS 14072-2003 for glass used with furniture.

Superior Front Ventilation Rails

All VIVA vivariums now include an innovative ventilation system incorporated into the top and bottom aluminium door rails. This effective system provides a constant airflow throughout the vivarium.

Rear Vents

Rear vents are added to arboreal and stacking vivariums to provide optimum temperature and humidity levels. Each vent contains a plentiful number of holes which are big enough to allow air to flow through, but small enough to prevent live food from escaping.

Cable Management

Outlet points have been formed in the edge of the back panel for cable management. Any size of plug or fitting can easily pass through prior to securing the lid. To remove or replace cables, simply loosen the cams and lift the lid. Cable access points are located at each end along the top. Either point can be easily closed with silicone if not required.

Security

All VIVA vivariums are supplied with pre-drilled sliding glass doors and a removable 'Slidestopper' door plug to prevent escapes. Alternatively, a stainless steel door lock and key, which can be fitted to any of our vivariums, is available separately, providing greater security against access and theft.

Solid Back

We believe that 3mm hardboard is not suitable for a professional vivarium. Its low compression structure and paint or foil surface means a very short product lifespan. This is why we use the same robust board for all panels, which is 5 times thicker! When sealed, our construction lasts many more years than cheaper manufactured products on the market.

MANUFACTURED IN THE UK

All Vivexotic products are proudly made in the UK

Vivexotic Viva

Viva

The Viva range from Vivexotic combines beautiful styling with superb practicality. With unique features, multiple sizes and stylish contemporary finishes, we're sure you'll find the perfect reptile home.

Efficient Front-Flow ventilation means:

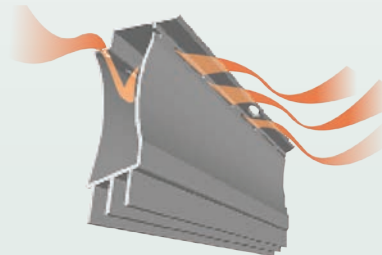

- **Better animal health and wellbeing**
- **Less chance of overheating**
- **Vents are less likely to be obstructed**

Let Your Vivarium Breathe
With Healthy, Convenient "Front-Flow" Ventilation

Superior Ventilation

Redesigned, effective ventilation has been built in to the stylish aluminium door rails. These sleek rails are perforated along their length, allowing cool air to enter at the base and warm air to exit through the top, creating superb air flow and preventing overheating. This means no rear vents are needed for terrestrial vivariums, allowing solid backgrounds to be used.

Stylish & Streamlined

VIVA terrestrial vivariums not only provide a distinctive piece of furniture for you but also provide a permanent home for your pet. Viva Terrestrial Vivariums are available in 4 sizes, from small to extra large as a stand alone vivarium or with a matching cabinet

Improved Security

All Viva glass sliding doors are pre-drilled and come with a plastic 'Slidestopper' door plug to prevent escapes. the improved design to an 'easy clip' system has made the process even easier.

'Slidestopper' door plug prevents slippage and escapes
