think bold

with Roma, Vicenza, Venezia or Profile

Creating a bold, beautiful impression with Fluval is easy. Co-ordinating furniture in a choice of finishes is available with every aquarium and the total look has been designed to blend with today's modern interiors.

Every aquarium is fully equipped with high-spec products making it easy to create ideal conditions to support a living ecosystem. Setting up your new aquarium can also be an enjoyably creative experience, with some stunning results...

Fish stocking levels for large aquariums

Stocking levels indicated for Roma, Vicenza, Venezia and Profile are based on 1cm of tropical fish per 2 litres of water OR 1cm of coldwater fish per 3 litres of water. Measurements are calculated on body length, excluding tail fins. Recommendations are based on actual water volume allowing for gravel, etc.

FLUVAL
Roma

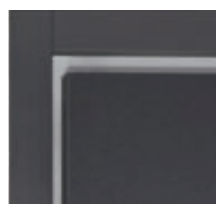

The **Fluval Roma** is a rectangular aquarium designed on clean, simple lines to bring sophistication to modern home decor.

With a choice of four sizes, each with co-ordinating furniture and a choice of two finishes, the Fluval Roma Collection has something for everyone.

Roma Cabinets

Fluval Roma aquarium cabinets are specially designed to completely co-ordinate with the equivalent Fluval Roma aquarium and are available in a choice of 2 finishes, Oak (with black inset) or Black (with silver inset) to match the colour scheme of your choice. Each cabinet has two doors with matching handles and one internal shelf. The Roma 240 cabinet also features a drilled top to accommodate external filter connections through the aquarium base.

DIMENSIONS

FLUVAL
Vicenza

FLUVAL
Venezia

With its graceful curves, the **Fluval Vicenza** bow-fronted aquarium adds a new dimension to flat walls. With a choice of two sizes, the Vicenza brings designer style to the craft of home aquatics.

Corners are sometimes neglected areas but with the **Fluval Venezia** these spaces glow and come to life with light, movement and colour making a bold, beautiful impression.

Vicenza and Venezia Cabinets

Matching cabinets for the Vicenza and Venezia aquariums are available in a modern oak finish. Each is designed to co-ordinate completely with the shape of the aquarium and provides a complete streamlined solution for the modern home.

All cabinets feature stylish high gloss handles, a drilled top for hidden filter connections and an internal shelf - the ideal place to keep all your fishkeeping sundries.

FLUVAL PROFILE

making an impression

Fluval Profile is a stunning masterpiece of quality and design. The aquarium, canopy and cabinet are integrated into one complete, uniquely styled unit which makes a magnificent feature in any home or office space.

Together with its flush side-opening doors, aluminium profiling and internal filter connections, the finished look is aesthetically clean and sharp. This extra deep aquarium also provides the experienced enthusiast with the opportunity to create a truly spectacular display. Fluval Profile is available in two sizes in either a stainless steel or textured black finish and includes distinctive aluminium profiling to canopy, aquarium base and corner posts.

Profile 1000

The right location

Deciding where your aquarium is going to live is an important decision and deserves some preparation and thought. Once the tank is fully set up with water and decorations it cannot be moved. The only alternative is to completely empty and dismantle it to start again in a new location - definitely NOT a good start to your new aquatic hobby!

Choosing the right place also depends on various factors which may have undesirable effects on the aquarium conditions. Radiators, sunny windows, fireplaces and other sources of heat should be avoided. TV's, speakers, hi-fi and any other sources of sound and vibration should be sited away from the aquarium as this will cause distress to the fish.

Location

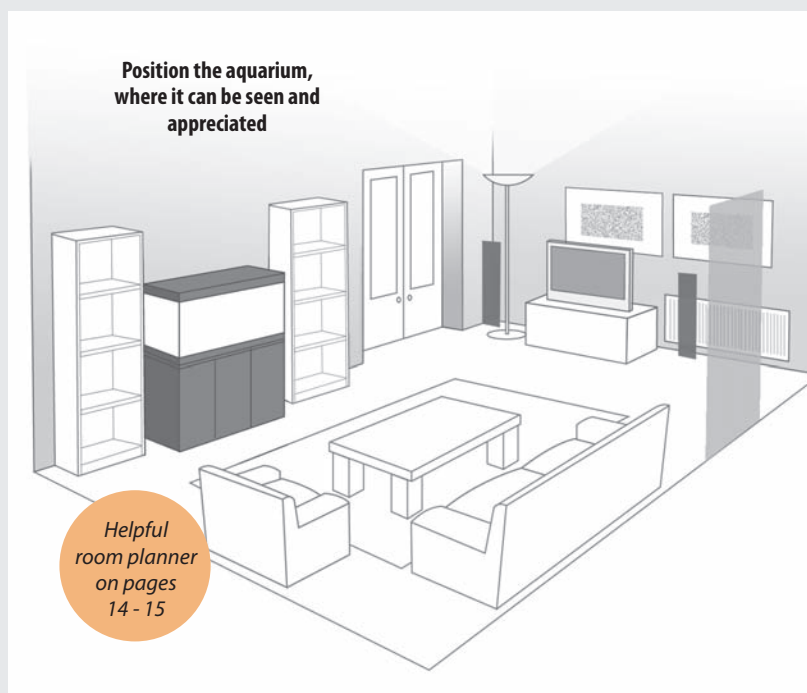

Study, dining room, living room, kitchen, entrance hall and office - wherever its final position you can be sure that your aquarium will attract interest from visitors and children. Be careful if you are considering using a conservatory - areas with temperature fluctuations are inadvisable. Don't hide it behind other furniture either - it deserves to be seen in pride of place. Use the room planner on pages 14 - 15 to help work out a good position. You may want to change the existing furniture arrangement to accommodate it too.

Power

Items of electrical equipment need access to mains power, so bear this in mind when choosing a site. Make sure you can reach the socket easily. Don't position too close to other electrical appliances where water spills may cause serious damage or safety hazards.

Weight

Water is extremely heavy - around 1 kilo per litre. Even the smallest Roma aquarium holds 90 litres - around 14 stones - and that's before adding any gravel or rocks! Always use the specially constructed aquarium cabinet and give some thought to the flooring too - is it strong enough to support the combined weight of a filled aquarium and cabinet?

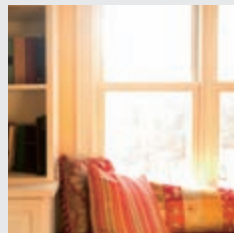

Choose a position for the aquarium that is:-

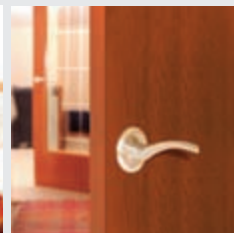

CLOSE TO

ANY SOURCES OF SOUND
AND VIBRATION

Products included

Each Fluval aquarium set contains a selection of the world's best selling aquarium products:-

1 Fluval U Filters

(included with Roma 90/125/200)

Discreet, but powerful, the Fluval U Filter combines mechanical, biological and chemical filtration within a fully submersible unit. Operates quietly and effectively, removing both solid and liquid wastes. Simple to install and maintain.

2 Fluval External Filters

(included with Roma 240, Vicenza 180/260, Venezia190 and Profile 850/1000)

The Fluval external filter is powerful and reliable. Its multi-stage system allows pro-active control of water characteristics. Operates outside the aquarium where it is easy to access for cleaning and maintenance.

3 Fluval M Heater

The Fluval M-Series Heater is designed to blend into the natural look of the aquarium with a specially coated glass casing reflecting the colours and shapes around it. Rigorous safety and quality tests ensure this high quality heater is safe and reliable.

4 Fluval E Heater

The Fluval E-Series Heater is simply the most advanced heater available. Equipped with an advanced microprocessor monitoring system with dual temperature sensors, the E-Series uses VueTech technology to deliver peace of mind by continuously displaying real time water temperature.

5 Glo Fluorescent Aquarium Lamps

Specially designed aquarium lighting. GLO T8 fluorescent lighting provides essential light stimulation to fish and plants. GLO T5 super high output lamps create a stunning display.

6 Marina LCD Digital Thermometer

An accurate, easy-to-read LCD display.

7 Fluval Aquarium Care Guide

Essential guide for setting up and looking after an aquarium.

8 Food and Water Treatments:-

Nutrafin Aqua Plus

Nutrafin Aqua Plus neutralises the chlorine and chloramine in tap water to make it safe for fish to live in. It also contains a pure herbal extract, known to be calming to fish.

Nutrafin Cycle

Nutrafin Cycle is a super concentrated formula of beneficial bacteria which, when added regularly, helps to quickly 'mature' the water conditions for the introduction of fish.

Nutrafin Max Tropical Fish Food

Quality food providing a balanced diet for tropical fish which also helps to enhance their vibrant colours. Nutrafin Max is formulated to provide precisely the right amount of phosphorus which helps to control algae and reduces the amount of fish wastes.

Room Planner

The graph opposite will help you to plan the location of your aquarium.
The plan drawings on this page are drawn to the same scale as the graph (one small square = 10 cm) so you can work out how everything fits.

Note the overall dimensions of the room and indicate the sizes and positions of principal features including chimney breasts, alcoves, doors, windows, plug sockets and sloping ceilings and any other features which may affect the positioning of the aquarium unit.

Use tracing paper to outline the shape of the desired aquarium unit then lay over the graph, in the area where you plan to put the aquarium.

Refer to the model's relevant pages for the combined aquarium and cabinet height.

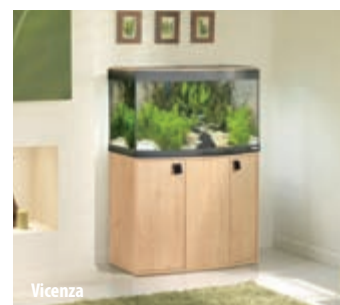

*Allow 40cm each side for side opening doors

*Allow 40cm each side for side opening doors

think small

with Chi, Edge and Spec

Easy to look after, with low operating costs and minimum space required, the Fluval range of nano aquariums brings the underwater world into your home without the need for large tanks or expensive equipment.

Small enough to fit on a desk and styled for maximum visual effect, each aquarium is fully equipped to create a unique environment for a small number of fish, shrimps or exotic plants.

Fish stocking levels for nano aquariums

Care should be taken to avoid overstocking when selecting fish for a nano aquarium. Allow 1cm bodylength of fish (excluding the tail) to every 3 litres of water. Fish are usually sold as juveniles so allow some extra space for fish to grow. Bear in mind also that many miniature fish species must be kept in shoals of at least 4 or 5 individuals in order to thrive. Always consult your aquatic retailer for help and advice.

FLUVAL
chi 
Let the Energy Flow

With striking artistic simplicity, **Fluval Chi** makes a stunning aquatic feature. Chi is versatile and manageable too and provides a stylish habitat for some fascinating miniature fish species.

As with all Fluval nano aquariums, Chi is easy to set up and maintain and, with a beautiful range of accessories and decorative features to choose from, allows you to create an individual look to suit your mood or surroundings.

beautiful simplicity

Inspired by ancient Chinese culture, Chi (pronounced 'chee'), describes the life force of living things and symbolises the positive effects of energy. The flowing water of Fluval Chi is believed to encourage Feng Shui, bringing prosperity and good luck to your home.

Fluval Chi comes with everything needed to start a new aquarium and features include:*

Filtration System

An easy to use, low maintenance filtration system.

LED Lighting System

11 powerful LED lamps provide brilliant plant or decor illumination.

Plant Basket

The plant basket can be filled with Fluval Chi decor pieces or natural plants to complement the Fluval Chi surroundings.

Pebble Basket

The decor tray holds either the pebble basket or additional decor pieces (available separately), which soften the sound of the trickling water.

Media Access

Easy access media cover ensures routine maintenance is quick and simple.

FLUVAL
edge

Photograph courtesy of: George Farmer, UKAPS. @TheAquascaper

Fluval Edge brings an exciting new look to aquatics, combining the most modern aquarium design with the beauty of nature.

This stylish little aquarium is designed to be filled to the top, leaving no visible water line. The result is a versatile feature which can be viewed from many levels, including from above, making it ideal to display on low table surfaces.

Note: Remember, water weighs 1kg per litre. Make sure your table can support the weight.

stunning from
any angle

Fluval Edge comes with everything needed to start a new aquarium and features include:*

High visibility

6-sided glass aquarium with a sealed top which provides spectacular high definition viewing and reduces evaporation for less maintenance.

Style from any angle

Casing module contains and hides all the filtration equipment for a neat, sleek look.

Easy access for maintenance

Perforated, removeable cover dissipates lamp heat and provides easy access to the filter lift-out trays.

LED lighting system

Powerful, economical LED lighting system with a Deep Blue Night Light setting.

Healthy for fish

Hidden aperture allows oxygen exchange to keep fish healthy.

Modern colours

A choice of 3 colours: Gloss Black, Gloss White or Pewter (46 litre model is only available in gloss white or black).

**Gravel, fish and decorations not included*

Edge

Fluval Edge includes a powerful 3 stage filtration system:

Powerful and easy to use the Edge filter with CycleGuard and 3 stage filtration helps to ensure clear water and a healthy environment.

- 1 Mechanical** Foam filter traps particles and debris
- 2 Chemical** Carbon insert absorbs odours, discolorations and impurities
- 3 Biological** BIOMAX insert expands biological capacity

FLUVAL Spec

relax and admire
the view

The sleek design of **Fluval Spec** adds a touch of class to any modern home or office setting. Good looking, simple to set up and easy to run, Spec gives you a feature which looks equally stylish by day or night.

Fluval Spec is available in 2 sizes and 2 colours (Gloss White or Gloss Black). The larger (19 litre) model provides a slimline panoramic scene without needing lots of tabletop space.

Fluval Spec comes with everything needed to start a new aquarium:*

Design

A stylishly simple glass tank with frosted glass filter section.

Filtration

Oversized 3-stage filtration for ultra clean water and less maintenance.

LED lighting system

Powerful, economical LED lights provide brilliant plant and decor illumination.

10 litre model: The 10 litre Spec includes 31 powerful, high luminosity LED's, suitable for aquatic plants.

19 litre model: Provides 37 high luminosity LED's plus a Deep Blue Night Light setting for a stunning effect after dark which is not intrusive to fish.

**Gravel, fish and decorations not included*

Fluval Spec includes an oversized 3 stage filtration system for reduced maintenance:

- 1 **Mechanical** Porous foam filter traps large particles and debris
- 2 **Chemical** Activated carbon absorbs odours, discolorations and impurities
- 3 **Biological** BIOMAX insert expands biological capacity
