

Biological Water Conditioners & Treatment			Tap Water Conditioners		Water Adjusters						Plant Nutrients
Nutrafin Cycle	Nutrafin Waste Control	Nutrafin Bio-Clear	Nutrafin Aqua Plus	Nutrafin Goldfish Plus	Nutrafin PH Adjust Up	Nutrafin PH Adjust Down	Nutrafin KH Booster	Nutrafin African Cichlid Conditioner	Nutrafin Clear Fast	Nutrafin Tropical Extracts	Nutrafin Plant Gro Iron Enriched

Regular maintenance activity ●
 Test before application ●
 NOTE: KH Booster (pH Stabilizer) will increase pH levels in soft water aquariums

●	●											MAINTENANCE:
●												Weekly optimum biological support
●			●	●							●	Partial Water change
●												Water change marine aquarium w/protein skimmer
			●	●								Water top up
●	●											Filter maintenance
											●	Plant feeding
●			●	●								SPECIFIQUE TREATMENT:
●			●	●		●	●	●	●			New fish introduction
												New aquarium installation
		●										Water cloudiness (biological)
									●			Water cloudiness (particulate)
●							●					High ammonia and/or nitrite level(s)
●			●	●								After medicating
			●	●								Transporting fish
			●	●								Fish abrasions, lacerations or wounds
●												Fish loss
	●											Surface film reduction & control
						●	●					pH adjustment
								●				KH increase required (improve pH buffering)
						●		●				pH regularly drops
									●			General Hardness increase required
●	●		●			●			●			AQUARIUM TYPE:
●	●		●						●			Heavily Stocked Aquariums
●	●		●						●			Cichlid aquariums
●	●		●	●		●			●			Goldfish aquariums
●	●		●				●	●	●			African Cichlid & Hard water aquariums
●	●		●						●			Planted aquariums
										●		Blackwater and/or Acidic pH Preferring Species
